

ENVIRONMENT, OCCUPATIONAL HEALTH AND SAFETY, AND QUALITY POLICY

- Keeping up with technological advancements through professional teamwork,
- Maximizing customer satisfaction and being a reliable company in every aspect,
- Being influential in the global market through effective utilization and development of our resources,
- Ensuring ecological balance in all our activities,
- Contributing to the development of environmental and occupational health and safety awareness among relevant parties,
- Minimizing waste at the source, promoting reuse and recycling whenever possible, and ensuring proper disposal of unutilized waste through appropriate methods,
- Ensuring efficient use of energy, raw materials, and natural resources,
- Preventing adverse effects on the environment, controlling accidents and hazards at their inception through necessary protective measures,
- Closely monitoring environmental dimensions and occupational health and safety-related hazards, making efforts to minimize them,
- Being a sought-after and preferred organization with high-quality standards,
- Ensuring the implementation and continuous improvement of Environmental, Occupational Health and Safety, and Quality Management System standards,
- Completing projects we undertake on time and in full,
- Pioneering new developments,
- Being competitive in terms of quality and cost,
- Valuing employees and fostering a culture of sharing and participation,
- Being open to criticism, inquisitive, and proactive,
- Pursuing success in every situation and being happy about it,
- Protecting nature and employees,
- Complying with legal obligations, current environmental and occupational health and safety legislation, and the requirements of the organizations we belong to,
- Working with performance exceeding customer demand in accordance with all laws and industry principles.
